INSTRUCTIONS TO AUTHORS

Manuscripts submitted for the consideration should report the results of an original work. Also, survey papers from the field experts will be considered for the review. Manuscripts for submission should be original results from author's research in the field of power electronics. Papers that have been previously published or submitted to other journals, conferences, or books in any language will not be considered for the *JPE* publication. However, the extended version of the paper presented at the conference, workshop, or symposium can be submitted to *JPE* for the consideration no later than 18 months from the closure of the event. After the due date, the submission will be invalid. In order to qualify for the review, the revised or extended version of the paper presented in the conference, workshop, or symposium should include significant improvements. The title and abstract of the paper should be different and at least 30% of the contents (introduction, body, conclusion and references) should be modified with new ideas and improvements. If a significant overlap (e.g. higher than 30% in terms of text) between the original conference paper and the submitted manuscript is found through the plagiarism detection software, the manuscript will be returned or rejected immediately. Authors should clearly indicate at which conference, workshop or symposium the manuscript has been presented for the initial submission. Also, the original conference paper should be uploaded at the time of initial submission. The conference paper should be cited in the manuscript and be added in the reference list. Please mention as to which contents in the manuscript has been improved from the original conference paper. Any violation of the rules mentioned above may cause an infringement of the copyright as well as plagiarism issues including a self-plagiarism. Every author bears the full responsibility for any legal issues.
