INSTRUCTIONS TO AUTHORS

Manuscripts submitted for the consideration should report the results of an original work. Also, survey papers from the field experts will be considered for the review.

Details on the “original works”

Papers that have been previously published or submitted to other journals, conferences, or books in any language will not be considered for the *JPE* publication. However, the extended version of the paper presented at the conference, workshop, or symposium can be submitted to *JPE* for the consideration no later than 18 months from the presentation. After the due date, the submission will be invalid. In order to qualify for the review, the extended version of the paper should include significant improvements. The title and abstract of the paper should be different and at least 30% of the contents (introduction, main body, conclusion and references) should be modified with new ideas and improvements. If a significant overlap (e.g. higher than 30% in terms of text) between the original conference paper and the submitted manuscript is found through the plagiarism detection software, the manuscript will be returned or rejected immediately. Authors should clearly indicate at which conference, workshop or symposium the manuscript has been presented for the initial submission. Also, the original conference paper should be uploaded at the initial submission. The conference paper should be cited in the manuscript and be added in the reference list. Also in cover letter, mention as to which contents in the manuscript have been improved from the original conference paper. Any violation of the rules mentioned above may cause an infringement of the copyright as well as a self-plagiarism. Every co-authors bear the full responsibility for any legal issues.

Plagiarism Policy

All the original conference papers and dissertations should be referred in manuscript. All the manuscripts for review should meet following requirements. Otherwise, the editorial committee refuses to review the manuscript or rejects to publish it.

1. Identify the original text body and form a reference mark. Even if a reference is made, the contents of the comparison/evaluation should be added.
2. The drawing, table or formula should be drawn or expanded as freshly as possible. If the original ones are imported, the author should resolve the license problem and reveal the courtesy copy
 - A. Imported ones from the graduation thesis must be licensed by university publisher and/or the copyright holder.
 - B. In case of articles, they must be licensed by the publisher.
3. Do not copy the original text body as it is.
4. Add new content as much as possible.
