Jian Sun, Rensselaer Polytechnic Institute, New York, USA
Pat Wheeler, University of Nottingham, Nottingham, UK
Dehong Xu, Zhejiang University, Hangzhou, China

Managing Editor

Sejin Jung, The Korean Institute of Power Electronics Administrative Office, Seoul, Korea

Journal of Power Electronics

Aims and Scope

The *Journal of Power Electronics (JPE)* publishes papers of a high technical standard with a suitable balance of practice and theory. It covers a wide range of applications and apparatus in the power electronics field. The scope of the JPE includes the following:

- Low Power Converter
- High Power Converters
- Motor Drives
- Grid and Power Quality
- Energy Management Systems
- Device, Modeling, and Control
- Consumer Power Electronics
- Emerging Power Electronics

The official abbreviation is *J. Power Electron*.

Copyright Information

For Authors

As soon as an article is accepted for publication, authors will be requested to assign copyright of the article (or to grant exclusive publication and dissemination rights) to the publisher (respective the owner if other than Springer Nature). This will ensure the widest possible protection and dissemination of information under copyright laws.

More information about copyright regulations for this journal is available at www.springer.com/43236

For Readers

While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, on video disks, etc., without first obtaining written permission from the publisher (respective the copyright owner if other than Springer Nature). The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

Springer Nature has partnered with Copyright Clearance Center's RightsLink service to offer a variety of options for reusing Springer Nature content. Contents continued from back cover

ENERGY MANAGEMENT SYSTEMS

New SOC estimation method under multi-temperature conditions based on parametric-estimation OCV
Q. Wang · W. Qi **614**

Model based state-of-energy estimation for $LiFePO_4$ batteries using unscented particle filter
J. Chang · M. Chi · T. Shen **624**

DEVICE, MODELING AND CONTROL

Driver circuit to eliminate bridge leg crosstalk in SiC MOSFETs
T. Gao · Z. Cheng · Q. Wang · Y. Yang **634**

Cover Illustration Fig. 1. Block diagram of the proposed variable time step controller, Fig. 12. Waveforms showing: **a** *dq*-currents, m_i and T_{samp} according to a step change of the *q*-current reference; **b** *dq*-currents (magnified): To acknowledge the academic contribution of Hyeon-gyu Choi and Jung-Ik Ha for the paper entitled "Dynamic current control using synchronous pulse-width modulation for permanent magnet machines".

Journal of Power Electronics

Volume 20 · Number 2 · March 2020

LOW POWER CONVERTERS

Quasi-resonant flyback PSR converter with adaptive frequency control
X. Han · C. Chang · L. He **341**

Experimental validation of multi-loop controllers for two-level cascaded positive output boost converter
R. Saktheeswaran · D. Murali **350**

Behavioral switching model for current-fed Cockcroft–Walton voltage multiplier
A. Rajaei · I. Dehghanian · M. Shahparasti · E. Poursmaeil **365**

DC–DC converter implementation with wide output voltage operation
B.-R. Lin **376**

HIGH POWER CONVERTERS

Second harmonic reduction method for ZVS operation in a fuel cell system
Y.-D. Kwon · J.-H. Park · K.-B. Lee **388**

Analysis of distortions in switch drives and currents related to balance strategy with sort method in MMC systems
C. Wang · L. Xiao · L. Zhang · F. Wu · Q. Liu **399**

Enhanced robustness with damping interval widening strategy of LCL-type converter under weak grid condition
Q. Wang · W. Qin · L. Wang · X. Han · P. Wang **410**

Model analysis, simplified control and sensitivity verification of modular multilevel DC–DC converter with parallel branches
Q. Ren · F. Xiao · S. Ai **428**

Predictive current control for indirect matrix converter with reduced current ripple
K.Y. Kim · Y. Bak · K.-B. Lee **443**

Modulation signal analysis and parameter selection for modular multi-level converters with harmonic injection method
Q. Zeng · F. Xiao · Q. Ren · S. Ai **455**

MOTOR DRIVES

Advanced model predictive current control for induction motor drive system fed by indirect matrix converter
Y. Mei · G. Yi **466**

Critical analysis of random frequency inverted sine carrier PWM fortification for half-controlled bipolar three-phase inverters
P. Muthukumar · L. Padmasuresh · K. Eswaramoorthy · S. Jeevananthan **479**

Current covariance analysis-based open-circuit fault diagnosis for voltage-source-inverter-fed vector-controlled induction motor drives
H. Yang · Y. Zhou · J. Zhao **492**

Dynamic current control using synchronous pulse-width modulation for permanent magnet machines
H. Choi · J.-I. Ha **501**

Modulating functions of space vector PWM for five-leg inverter fed two single-phase induction motors
S. Dangeam · V. Kinnares **511**

MTPA operation scheme with current feedback in V/f control for PMSM drives
W.-J. Kim · S.-H. Kim **524**

Zero overshoot speed controller with active damping for improving engine clutch engagement performance
B. Yang · T. Jung · Y. Ko · J. An · H. Mok **538**

Predictive control with optimal vector sequence for permanent magnet synchronous motors
C. Li · T.-N. Shi · Y. Yan · Z.-Q. Zhou · C.-L. Xia **553**

GRID AND POWER QUALITY

Parameters optimization design for LCL-type STATCOMs under complex power grid
X. Wang · M. Wang · L. Wang · G. Fu · J. Qiao **566**

Current and power quality multi-objective control of virtual synchronous generators under unbalanced grid conditions
J. Wu · T. Liu · T. Qiu · D. Xu **580**

Coordinated control of series compensation link and bus interface converter in the AC–DC hybrid microgrid
R. Meng · Y. Du · X. Han · L. Wang · P. Wang **590**

Distributed control scheme for accurate reactive power sharing with enhanced voltage quality for islanded microgrids
T.V. Hoang · H.-H. Lee **601**

Springer

Table of Contents

Journal of Power Electronics Vol. 20, No. 2 March 2020

Low Power Converters

Quasi-resonant flyback PSR converter with adaptive frequency control
…… Xiong Han, Changyuan Chang, Luyang He 341

Experimental validation of multi-loop controllers for two-level cascaded positive output boost converter
…… R. Saktheeswaran, D. Murali 350

Behavioral switching model for current-fed Cockcroft–Walton voltage multiplier
…… Amirhossein Rajaei, Iman Dehghanian, Mahdi Shahparasti, Edris Poursmaeil 365

DC–DC converter implementation with wide output voltage operation
…… Bor-Ren Lin 376

High Power Converters

Second harmonic reduction method for ZVS operation in a fuel cell system
…… Yong-Dae Kwon, Jin-Hyuk Park, Kyo-Beum Lee 388

Analysis of distortions in switch drives and currents related to balance strategy with sort method in MMC systems
…… Chuyang Wang, Lan Xiao, Li Zhang, Feng Wu, Qi Liu 399

Enhanced robustness with damping interval widening strategy of LCL-type converter under weak grid condition
…… Qi Wang, Wenping Qin, Lei Wang, Xiaoqing Han, Peng Wang 410

Model analysis, simplified control and sensitivity verification of modular multilevel DC–DC converter with parallel branches
…… Qiang Ren, Fei Xiao, Sheng Ai 428

Predictive current control for indirect matrix converter with reduced current ripple
…… Keon Young Kim, Yeongsu Bak, Kyo-Beum Lee 443

Modulation signal analysis and parameter selection for modular multi-level converters with harmonic injection method
…… Qifan Zeng, Fei Xiao, Qiang Ren, Sheng Ai 455

Motor Drives

Advanced model predictive current control for induction motor drive system fed by indirect matrix converter
…… Yang Mei, Gao Yi 466

Critical analysis of random frequency inverted sine carrier PWM fortification for half-controlled bipolar three-phase inverters
…… P. Muthukumar, L. Padmasuresh, K. Eswaramoorthy, S. Jeevananthan 479

Current covariance analysis-based open-circuit fault diagnosis for voltage-source-inverter-fed vector-controlled induction motor drives
…… Huanwen Yang, Yang Zhou, Jin Zhao 492

Dynamic current control using synchronous pulse-width modulation for permanent magnet machines
…… Hyeon-gyu Choi, Jung-Ik Ha 501

Modulating functions of space vector PWM for five-leg inverter fed two single-phase induction motors
…… Sirichai Dangeam, Vijit Kinnares 511
MTPA operation scheme with current feedback in V/f control for PMSM drives
…… Won-Jae Kim, Sang-Hoon Kim 524
Zero overshoot speed controller with active damping for improving engine clutch engagement performance
…… Byunghoon Yang, Taehee Jung, Youngkwan Ko, Junmo An, Hyungsoo Mok 538
Predictive control with optimal vector sequence for permanent magnet synchronous motors
…… Chen Li, Ting-Na Shi, Yan Yan, Zhan-Qing Zhou, Chang-Liang Xia 553

Grid and Power Quality

Parameters optimization design for LCL-type STATCOMs under complex power grid
…… Xiangyu Wang, Minglei Wang, Liguo Wang, Guangjie Fu, Jinxin Qiao 566
Current and power quality multi-objective control of virtual synchronous generators under unbalanced grid conditions
…… Jian Wu, Tong Liu, Tianyi Qiu, Dianguo Xu 580
Coordinated control of series compensation link and bus interface converter in the AC–DC hybrid microgrid
…… Runquan Meng, Yi Du, Xiaoqing Han, Lei Wang, Peng Wang 590
Distributed control scheme for accurate reactive power sharing with enhanced voltage quality for islanded microgrids
…… Tuan V. Hoang, Hong-Hee Lee 601

Energy Management Systems

New SOC estimation method under multi-temperature conditions based on parametric-estimation OCV
…… Qiuting Wang, Wei Qi 614
Model based state-of-energy estimation for LiFePO4 batteries using unscented particle filter
…… Jiaqing Chang, Mingshan Chi, Teng Shen 624

Device, Modeling, and Control

Driver circuit to eliminate bridge leg crosstalk in SiC MOSFETs
…… Tian Gao, Ze Cheng, Qi Wang, Yan Yang 634
