Jian Sun, Rensselaer Polytechnic Institute, New York, USA

Pat Wheeler, University of Nottingham, Nottingham, UK

Dehong Xu, Zhejiang University, Hangzhou, China

Managing Editor

Sejin Jung, The Korean Institute of Power Electronics Administrative Office, Seoul, Korea

Journal of Power Electronics

Aims and Scope

The *Journal of Power Electronics (JPE)* publishes papers of a high technical standard with a suitable balance of practice and theory. It covers a wide range of applications and apparatus in the power electronics field. The scope of the JPE includes the following:

- Low Power Converter
- High Power Converters
- Motor Drives
- Grid and Power Quality
- Energy Management Systems
- Devices and Components
- Consumer Power Electronics
- Emerging Power Electronics

The official abbreviation is *J. Power Electron.*

Copyright Information

For Authors

As soon as an article is accepted for publication, authors will be requested to assign copyright of the article (or to grant exclusive publication and dissemination rights) to the publisher (respective the owner if other than Springer Nature). This will ensure the widest possible protection and dissemination of information under copyright laws.

More information about copyright regulations for this journal is available at www.springer.com/43236

For Readers

While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints),

as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, on video disks, etc., without first obtaining written permission from the publisher (respective the copyright owner if other than Springer Nature). The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

Springer Nature has partnered with Copyright Clearance Center's RightsLink service to offer a variety of options for reusing Springer Nature content. For permission to reuse our content please locate the material that you wish to use on link.springer.com or on springerimages.com and click on the permissions link or go to copyright.com and enter the title of the publication that you wish to use. Co-Publisher

The Korean Institute of Power Electronics

LOW POWER CONVERTERS

Auxiliary current control for improving unloading transient recovery of buck converter

D. Kim · J.-W. Shin 385

HIGH POWER CONVERTERS

Design of a 5.6 kW EV low-voltage DC/DC converter based on full-bridge converter with input series output parallel structure

D.-Y. Hong · S.-J. Kong · J.-Y. Lee 395

Robust finite-control-set model predictive control for voltage source inverters against LC-filter parameter mismatch and variation

V.-T. Le · H.-H. Lee 406

Zero-current-switching full-bridge DC/DC converter with reduced conduction losses for renewable energy MVDC collection systems

X. He · R. Hu 420

MOTOR DRIVES

Optimal pulse pattern with negative pulses and third harmonic mixed injection

Q. Zhang · W. Song · T. Shui · H. Lyu 429

Parameter identification of energy consumption dynamic model for double-motor-driven belt conveyers based on Actor–Critic framework

L. Xiao · L. Zhang · F. Gao · Z. Yan · Y. Li · W. Song 442

GRID AND POWER QUALITY

UPQC-based effective mitigation of harmonics by signal processing approach

A. Nagarajan · M.V. Suganyadevi 454

Voltage compensation using sequence component detection technique under sag, swell, and distorted conditions of grid voltages

S.F. Al-Gahtani 465

Power quality improvement of distribution power networks using capacitor-less H-bridge inverters for voltage regulation

A. Angamuthu · M. Sundaram · V. Balaji 478

DEVICES AND COMPONENTS

Joint SOC–SOP estimation method for lithium-ion batteries based on electro-thermal model and multi-parameter constraints

P. Qin · Y. Che · H. Li · Y. Cai · M. Jiang 490

EMERGING POWER ELECTRONICS

Analysis and validation of novel inverter and LCC-S topology-based WPT system

H. Zhou · H. Liu · Q. Deng · L. Fang 503

Deep learning-based estimation technique for capacitance and ESR of input capacitors in single-phase DC/AC converters

H.-J. Park · J.-C. Kim · S. Kwak 513

Unified magnetic field model of regular polygonal coils for electromagnetic assessment in WPT systems

X. Shangguan · P. Tan · T. Tan · B. Song · H. Liu 522

Multi-DoF wireless power transfer systems based on magnetic dipole coils with multiple receivers

X. Liu · C. Rong · X. Tao · C. Lu · Y. Zeng · R. Liu · M. Liu 534

Wireless power transfer system with aligned two transmitters and one receiver for power distribution system in smart buildings

H.-W. You · J.-H. Park · B.-H. Lee 547

Table of Contents

Journal of Power Electronics Vol. 22, No. 3 March 2022

Low Power Converters

Auxiliary current control for improving unloading transient recovery of buck converter
..... Dongwook Kim, Jongwon Shin 385

High Power Converters

Design of a 5.6 kW EV low-voltage DC/DC converter based on full-bridge converter with input series output parallel structure Dae-Young Hong, So-Jeong Kong, Jun-Young Lee 395
Robust finite-control-set model predictive control for voltage source inverters against LC-filter parameter mismatch and variation Van-Tien Le, Hong-Hee Lee 406
Zero-current-switching full-bridge DC/DC converter with reduced conduction losses for renewable energy MVDC collection systems Xiaokun He, Renjie Hu 420

Motor Drives

Optimal pulse pattern with negative pulses and third harmonic mixed injection
..... Qinqing Zhang, Wenxiang Song, Tianqing Shui, Hongzhang Lyu 429
Parameter identification of energy consumption dynamic model for double-motor-driven belt conveyers based on Actor–Critic framework Li Xiao, Liyi Zhang, Feng Gao, Zhi Yan, Yanqin Li, Wenqiang Song 442

Grid and Power Quality

UPQC-based effective mitigation of harmonics by signal processing approach
..... Ananthan Nagarajan, M. V. Suganyadevi 454
Voltage compensation using sequence component detection technique under sag, swell, and distorted conditions of grid voltages Saad F. Al-Gahtani 465
Power quality improvement of distribution power networks using capacitor-less H-bridge inverters for voltage regulation A. Angamuthu, M. Sundaram, V. Balaji 478

Devices and Components

Joint SOC–SOP estimation method for lithium-ion batteries based on electro-thermal model and multi-parameter constraints Peijun Qin, Yanbo Che, Hongfeng Li, Yibin Cai, Mingda Jiang 490

Emerging Power Electronics

Analysis and validation of novel inverter and LCC-S topology-based WPT system
..... Hong Zhou, Haitang Liu, Qijun Deng, Li Fang 503
Deep learning-based estimation technique for capacitance and ESR of input capacitors in single-phase DC/AC converters Hye-Jin Park, Jae-Chang Kim, Sangshin Kwak 513

Unified magnetic field model of regular polygonal coils for electromagnetic assessment in WPT systems	Xu Shangguan, Pingan Tan, Tingyu Tan, Bin Song, Huadong Liu	522
Multi-DoF wireless power transfer systems based on magnetic dipole coils with multiple receivers	Xiaobo Liu, Cancan Rong, Xiong Tao, Conghui Lu, Yingyin Zeng, Renzhe Liu, Minghai Liu	534
Wireless power transfer system with aligned two transmitters and one receiver for power distribution system in smart buildings	Hyun-Woo You, Jung-Hoon Park, Byoung-Hee Lee	547
