LOW POWER CONVERTERS

Phase lag compensation for improving the stability of LCL-type converters under weak grid condition
J. Wang · G. Pan · J. Ouyang · C. Liu · Y. Zhou · G. Fei 727

High step-up-coupled inductor SEPIC DC–DC converter with input current ripple cancellation
S. W. Lee · H. L. Do 739

HIGH POWER CONVERTERS

Unbalanced control strategy featuring inconsistent sub-module voltage for modular multilevel converter–bidirectional DC–DC converter
P. Chen · F. Xiao · J. Liu · Z. Zhu · Z. Huang 750

Zero voltage switching non-isolated bidirectional DC–DC converter with transient current built-up technique
S. Fan · H. He · S. Chen · J. Duan · J. You · L. Bai 764

MOTOR DRIVES

A vector-splitting method for neutral-point voltage regulation in a three-level inverter
H. Hwang · W. Lee · Y. Park 773

High-frequency response current direct demodulation method for sensorless control of interior permanent magnet synchronous motor drives
W. Li · J. Liu · C. Gong 784

Reactive compensation of long primary HTS-linear synchronous machines
K. Guo · Y. Li · L. Shi · Y. Du 796

Pulsewidth modulation method to balance the loss distribution of dual inverter to drive open-end winding motor
K. Kim · Y. Park 809

GRID AND POWER QUALITY

Bidirectional-friendly rectifier control strategy for advanced traction power supply system under unbalanced supply
L. Zeng · P. Han · T. Huang · X. He 821

ENERGY MANAGEMENT SYSTEMS

Fast cycle life evaluation method for ternary lithium-ion batteries based on divided SOC intervals
Q. Wang · J. Sun · H. Wu · W. Qi · H. Jin · L. Ling 831

Comparative analysis of photovoltaic/rechargeable batteries sizing-dependent configurations for optimal energy management strategies in microgrids
Z. Cabrane · J. Kim · K. Yao · S. H. Lee 841

Capacity estimation of lithium-ion batteries using convolutional neural network and impedance spectra
T. K. Pradyumna · K. Cho · M. Kim · W. Choi 850

DEVICES AND COMPONENTS

Optimized junction temperature fluctuation suppression technique for SiC MOSFETs in a wireless charging system
R. Wang · X. Huang · J. Li 859

CONSUMER POWER ELECTRONICS

Predictive charge control for LLC resonant converters
S. Chen · G. Du · Y. Lei · T. Li 870

EMERGING POWER ELECTRONICS

Three-dimensional geometric optimization of WPT coils for coupling coefficient maximization
W. Gao · H. Li · Y. Tang 883

**Managing Editor**

Sejin Jung, The Korean Institute of Power Electronics Administrative Office, Seoul, Korea
Aims and Scope
The Journal of Power Electronics (JPE) publishes papers of a high technical standard with a suitable balance of practice and theory. It covers a wide range of applications and apparatus in the power electronics field. The scope of the JPE includes the following:

- Low Power Converter
- High Power Converters
- Motor Drives
- Grid and Power Quality
- Energy Management Systems
- Devices and Components
- Consumer Power Electronics
- Emerging Power Electronics

The official abbreviation is J. Power Electron.

Copyright Information
For Authors
As soon as an article is accepted for publication, authors will be requested to assign copyright of the article (or to grant exclusive publication and dissemination rights) to the publisher (respective the owner if other than Springer Nature). This will ensure the widest possible protection and dissemination of information under copyright laws.

More information about copyright regulations for this journal is available at www.springer.com/43236

For Readers
While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, on video disks, etc., without first obtaining written permission from the publisher (respective the copyright owner if other than Springer Nature). The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

LOW POWER CONVERTERS
Phase lag compensation for improving the stability of LCL-type converters under weak grid condition
J. Wang · G. Pan · J. Ouyang · C. Liu · Y. Zhou · G. Fei 727
High step-up-coupled inductor SEPIC DC–DC converter with input current ripple cancellation
S. W. Lee · H. L. Do 739

HIGH POWER CONVERTERS
Unbalanced control strategy featuring inconsistent sub-module voltage for modular multilevel converter–bidirectional DC-DC converter
P. Chen · F. Xiao · J. Liu · Z. Zhu · Z. Huang 750
Zero voltage switching non-isolated bidirectional DC-DC converter with transient current built-up technique
S. Fan · H. He · S. Chen · J. Duan · J. You · L. Bai 764

MOTOR DRIVES
A vector-splitting method for neutral-point voltage regulation in a three-level inverter
H. Huang · W. Lee · Y. Park 773
High-frequency response current direct demodulation method for sensorless control of interior permanent magnet synchronous motor drives
W. Li · J. Liu · C. Gong 784
Reactive compensation of long primary HTS-linear synchronous machines
K. Guo · Y. Li · L. Shi · Y. Du 796
Pulsewidth modulation method to balance the loss distribution of dual inverter to drive open-end winding motor
K. Kim · Y. Park 809

GRID AND POWER QUALITY
Bidirectional-friendly rectifier control strategy for advanced traction power supply system under unbalanced supply
L. Zeng · F. Han · T. Huang · X. He 821

ENERGY MANAGEMENT SYSTEMS
Fast cycle life evaluation method for ternary lithium-ion batteries based on divided SOC intervals
Q. Wang · J. Sun · H. Wu · W. Qi · H. Jin · L. Ling 831
Comparative analysis of photovoltaic/rechargeable batteries sizing-dependent configurations for optimal energy management strategies in microgrids
Z. Cabrane · J. Kim · K. Yao · S. H. Lee 841
Capacity estimation of lithium-ion batteries using convolutional neural network and impedance spectra
T. K. Pradynsma · K. Cho · M. Kim · W. Choi 850

DEVICES AND COMPONENTS
Optimized junction temperature fluctuation suppression technique for SiC MOSFETs in a wireless charging system
R. Wang · X. Huang · J. Li 859

CONSUMER POWER ELECTRONICS
Predictive charge control for LLC resonant converters
S. Chen · G. Du · Y. Lei · T. Li 870

EMERGING POWER ELECTRONICS
Three-dimensional geometric optimization of WPT coils for coupling coefficient maximization
W. Gao · H. Li · Y. Tang 883

# Table of Contents

**Journal of Power Electronics Vol. 22, No. 5 May 2022**

## Low Power Converters

Phase lag compensation for improving the stability of LCL-type converters under weak grid condition  
Jianfeng Wang, Guobing Pan, Jing Ouyang, Chengyao Liu, Yinghao Zhou, Gong Fei  727

High step-up-coupled inductor SEPIC DC–DC converter with input current ripple cancellation  
Sin-Woo Lee, Hyun-Lark Do  739

## High Power Converters

Unbalanced control strategy featuring inconsistent sub-module voltage for modular multilevel converter–bidirectional DC–DC converter  
Peng Chen, Fei Xiao, Jilong Liu, Zhichao Zhu, Zhaojie Huang  750

Zero voltage switching non-isolated bidirectional DC–DC converter with transient current built-up technique  
Shaogui Fan, Haifei He, Shang Chen, Jiandong Duan, Jiang You, Longlei Bai  764

## Motor Drives

A vector-splitting method for neutral-point voltage regulation in a three-level inverter  
Hankyu Hwang, Woosuk Lee, Yongsoon Park  773

High-frequency response current direct demodulation method for sensorless control of interior permanent magnet synchronous motor drives  
Wenzhen Li, Jinglin Liu, Chao Gong  784

Reactive compensation of long primary HTS-linear synchronous machines  
Keyu Guo, Yaohua Li, Liming Shi, Yumei Du  796

Pulsewidth modulation method to balance the loss distribution of dual inverter to drive open-end winding motor  
Kihayng Kim, Yongsoon Park  809

## Grid and Power Quality

Bidirectional-friendly rectifier control strategy for advanced traction power supply system under unbalanced supply  
Li Zeng, Pengcheng Han, Tongyue Huang, Xiaojiong He  821

## Energy Management Systems

Fast cycle life evaluation method for ternary lithium-ion batteries based on divided SOC intervals  
Qiuting Wang, Jiani Sun, Hong Wu, Wei Qi, Hui Jin, Li Ling  831

Comparative analysis of photovoltaic/rechargeable batteries sizing-dependent configurations for optimal energy management strategies in microgrids  
Zineb Cabrane, Jonghoon Kim, Kisoo Yoo, Soo-Hyoung Lee  841

Capacity estimation of lithium-ion batteries using convolutional neural network and impedance spectra  
T. K. Pradyumna, Kangcheol Cho, Minseong Kim, Woojin Choi  850
Devices and Components

Optimized junction temperature fluctuation suppression technique for SiC MOSFETs in a wireless charging system .............................. Ruoyin Wang, Xueliang Huang, Jiacheng Li  859

Consumer Power Electronics

Predictive charge control for LLC resonant converters

.................................................. Siqiang Chen, Guiping Du, Yanxiong Lei, Tuhuan Li  870

Emerging Power Electronics

Three-dimensional geometric optimization of WPT coils for coupling coefficient maximization

.......................................................... Weipeng Gao, Hongchang Li, Yi Tang  883
