LOW POWER CONVERTERS
Design of pseudo-single-stage-type isolated/bidirectional converter for battery formation equipment
Hierarchical carrier-based discontinuous PWM strategy for hybrid-switch current source rectifier
W. Wang · X. Meng · X. Liang 903
Inverse system optimal control of interleaved boost converters
D. Xiao · Y. Lu 915
Extendable space-time switched-capacitor multilevel inverter with fault-tolerant capability
Y. Wang · H. Zhang · J. Liu · K. Wang · J. Liang 923
High dev/dt immunity, high insulation voltage, ultra-compact, inductive power supply for gate-drivers of wide-bandgap semiconductor switches
J. Lee · J. Roh · S. Kim · S.-H. Lee 935

HIGH POWER CONVERTERS
Fault detection and tolerant control for flying-capacitor modular multilevel converters feeding induction motor drives
D. D. Le · S. Hong · D.-C. Lee 947

MOTOR DRIVES
Full closed loop-based dynamic accuracy enhancement for elastic joints
H. Liu · Y. Wang · X. Shan 959

GRID AND POWER QUALITY
Efficiency optimization of variable-frequency controlled power factor correction converters
Y. Zhou · X. He · S. Liu · P. Hong · J. Ren · D. Li 970
Efficient learning approach using new combined fuzzy-M5P model tree: experimental investigation of active power filters
A. Boushata · S. Moulaham · N. Kabache 981

DEVICES AND COMPONENTS
Inception module and deep residual shrinkage network-based arc fault detection method for pantograph–catenary systems
B. Li · F. Cui 991
Effect of demagnetization faults on line start AF-PMSM performance
M. Eker · M. Özsoy 1001

CONSUMER POWER ELECTRONICS
Design of 20 kW audio power supply for single-phase/three-phase applications
Enhanced load adaptive modulation of induction heating series resonant inverters to heat various-material vessels

EMERGING POWER ELECTRONICS
Neutral point voltage balance and surge voltage reduction for three-level converters in PMSM starting process based on narrow pulse suppression
W. Li · X. Wen · J. Zhang · Y. Wang 1033
A SiC MOSFET-based parallel multi-inverter inductive power transfer (IPT) system
Q. Bo · L. Wang · Y. Zhang 1047

Journal of Power Electronics

Aims and Scope
The Journal of Power Electronics (JPE) publishes papers of a high technical standard with a suitable balance of practice and theory. It covers a wide range of applications and apparatus in the power electronics field. The scope of the JPE includes the following:
- Low Power Converters
- High Power Converters
- Motor Drives
- Grid and Power Quality
- Energy Management Systems
- Devices and Components
- Consumer Power Electronics
- Emerging Power Electronics

The official abbreviation is J. Power Electron.

Copyright Information
For Authors
As soon as an article is accepted for publication, authors will be requested to assign copyright of the article (or to grant exclusive publication and dissemination rights) to the publisher (respective the owner if other than Springer Nature). This will ensure the widest possible protection and dissemination of information under copyright laws.

More information about copyright regulations for this journal is available at www.springer.com/43236

For Readers
While the advice and information in this journal is believed to be true and accurate at the date of its publication, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may have been made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, on video disks, etc., without first obtaining written permission from the publisher (respective the copyright owner if other than Springer Nature). The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

Springer Nature has partnered with Copyright Clearance Center’s RightsLink service to offer a variety of options for reusing Springer Nature content. For permission to reuse our content please locate the material that you wish to use on link.springer.com or on springerimages.com and click on the permissions link or go to copyright.com and enter the title of the publication that you wish to use. LOW POWER CONVERTERS

Design of pseudo-single-stage-type isolated/bidirectional converter for battery formation equipment

Hierarchical carrier-based discontinuous PWM strategy for hybrid-switch current source rectifier
W. Wang · X. Meng · X. Liang 903

Inverse system optimal control of interleaved boost converters
D. Xiao · Y. Lu 915

Extendable space-time switched-capacitor multilevel inverter with fault-tolerant capability
Y. Wang · H. Zhang · J. Liu · K. Wang · J. Liang 923

High dv/dt immunity, high insulation voltage, ultra-compact, inductive power supply for gate-drivers of wide-bandgap semiconductor switches
J. Lee · J. Roh · S. Kim · H. Lee 935

HIGH POWER CONVERTERS

Fault detection and tolerant control for flying-capacitor modular multilevel converters feeding induction motor drives
D. Li · L. Song · D.-C. Lee 947

MOTOR DRIVES

Full closed loop-based dynamic accuracy enhancement for elastic joints
H. Liu · Y. Wang · X. Shan 959

GRID AND POWER QUALITY

Efficiency optimization of variable-frequency controlled power factor correction converters
Y. Zhou · X. He · S. Liu · P. Hong · J. Ren · D. Li 970

Efficient learning approach using new combined fuzzy-M5P model tree: experimental investigation of active power filters
A. Boulhoute · S. Moulahom · N. Kabache 981

DEVICES AND COMPONENTS

Inception module and deep residual shrinkage network-based arc fault detection method for pantograph–catenary systems
B. Li · F. Cui 991

Effect of demagnetization faults on line start AF-PMSM performance
M. Eker · M. Ozsoy 1001

CONSUMER POWER ELECTRONICS

Design of 20 kW audio power supply for single-phase/three-phase applications

Enhanced load adaptive modulation of induction heating series resonant inverters to heat various-material vessels

EMERGING POWER ELECTRONICS

Neutral point voltage balance and surge voltage reduction for three-level converters in PMSM starting process based on narrow pulse suppression
W. Li · X. Wen · J. Zhang · Y. Wang 1033

A SiC MOSFET-based parallel multi-inverter inductive power transfer (IPT) system
Q. Bo · L. Wang · Y. Zhang 1047
